### **The Manhattan Lift Procedure Performed by Dr. Tal Dagan**

This is a proprietary procedure developed by Dr. Dagan based on his experience performing hundreds of facelift procedures a year. This is a facelift procedure that is performed under local anesthesia without any need for intravenous drug administration or general anesthesia.

#### **Manhattan Facelift - Before and After Images**

The reliance on local anesthesia reduces risks associated with general anesthesia. The procedure is minimally invasive and involves bringing the tissues underneath the skin surface to their natural position. This reverses gravitational changes produced by aging such as jowls, neck laxity, wrinkles and flattening of the cheek bones.

The work underneath the surface of the skin will restore the youthfulness of the face without over tightening the skin. The superiority of the Manhattan lift over a conventional (deep plane) facelift lies in a shorter procedure time, safer procedure, and shorter downtime with comparable and long lasting results.

#### **About Dr. Tal Dagan**

A leader in the field of facial and reconstructive cosmetic surgery, Dr. Tal Dagan has developed breakthrough techniques including Liquid (non surgical) and 90 Minute Seamless (surgical) Face Lifts. His special interest is in facial rejuvenation with minimally invasive procedures and the treatment and prevention of early facial aging. Dr. Dagan's innovative approach is the realization of his refined aesthetic and extensive reconstructive facial surgery experience.

Dagan has distinguished himself with a wide range of professional credentials and provides his patients with a wealth of medical knowledge and highly skilled clinical techniques. He is board certified in Ear, Nose, Throat, Head and Neck Surgery and continued to refine his expertise with a dual fellowship in Facial, Plastic and Reconstructive as well as Craniofacial Surgery.

He has studied and trained at some of the most highly regarded medical and educational institutions including the world famous Cleveland Clinic, Columbia University and the Tel Aviv Sackler School of Medicine. At Columbia University's St. Luke's-Roosevelt Hospital he participated with Dr. Peter Costantino on complex reconstructive surgery.

Dr. Dagan is an active member of the American Academy of Otolaryngology Head and Neck Surgery, The American Academy of Facial Plastic and Reconstructive Surgery, the American Academy of Cosmetic Surgery, the New York Facial Plastic Surgery Society. He is also a fellow of the esteemed American College of Surgeons and a fellow member of the American Medical Association.

He currently performs surgery at his private facility on Manhattan's Upper East Side. He is also on the medical staff at the New York Eye and Ear Infirmary, Lenox Hill Hospital and has also operated at the Roosevelt University Hospital of Columbia University College of Physicians and Surgeons all located in New York City. He is also affiliated with Hoboken University Medical Center and Christ Hospital in New Jersey.

Dr. Dagan performs hundreds of cosmetic surgical procedures per year. His training and expertise includes all aspects of facial plastic and reconstructive surgery including state of the art minimally invasive non-surgical procedures.
